People in Panic.

People in Panic.
The night of Angust 15th was rendered ceadful by flashing lightning and pourge rain, the electric cables and wires inspling as a result of the constant rong earth shocks, which occurred all at night, causing the greatest contention, which was hightened by the calling of fire bells announcing the waking out of fires in various quarters, the city. Each earth shock was followed by walls and prayers from the copie, who were kneeling in the rain in the call.

The first great shock insted four minutes and fifty seconds. Such a tong shock had never occurred before in the memory of any inhabitant of Santlago. It citized the hells of the churches to ring, pictures awong out from the walls, and there was a great heaving motion of the ground. Experts say the only thing which saved Santlago from complete ruin was that the motion was circular. The principal shock was from Valparaiso to Santlago and Meripilia, with its center rat Limache. The last two mentioned towns were destroyed, as were also Apulliota and Lialdar.

Cataclysm Foretold.

Cataclysm Foretold.
The statement that the approach of the earthquake was announced by the naval observatory at Valparaiso two days previous to its occurrence is confirmed. The news was published in the Chilean press on Wednesday, August 15th, the day before the earthquake occurred.

Santiago is still practically isolated telegraphically from all other parts of Chile, but an improvised line to Los Andess, connecting with the European cables, is working.

No really definite newsphas yet been received here from Valparaiss, except the Governor's official report to the President, cuttlining the situation and adding that he carnestly requests reinforcements of troops, which to-day were sent to him by forced marches.

Caring for Destitute.

Caring for Destitute.

The Governor informed the President that he had enused the construction of sheds on Brazil Avenue in order to shelter the hondless families. He estimated that the quantity of provisions on this way to Valparaiso and the stock on hand there would be sufficient to last a month. The water supply, however, is very sher; owing to the destruction of the water works. He calculated that two weeks must elapse before traffic would be restored in some of the streets.

The Governor says the only illumination of Valparisos at night is that furnished by the burning buildings. Difficulty is experienced in burning the bodies of the dead, owing to the panic prevailing. The authorities of Valparniso also have to contend with serious difficulties in succoring the wounded, owing to the fact that all the drug stores apparently were destroyed, and that some time clapsed before medical supplies from this city reached the stricken port.

Santiago Threatened.

Santiago Threatened.

Santiago Inreatened.

The state of affairs at Valparaiso furnishes a serious outlook for Santiago, since many of the homeless people at the fermer place will undoubtedly make their way here, and there is not sufficient accommodation or food in this city for the destitute people of Santiago.

The lighting and fuel question is also graving more serious here, since no coal

railroad being damaged north and south of this city.

The uncertainty as to what is occurring oscwhere in Chile, and the almost complete isolation of Sautlego, combined with the continuing earth shocks, are forgibly trying, and render the people almost desperate. A dispatch received here from Liranche says that a hundred bodies romain unburied, and that the authorities up to the present time have been only able to bury two hundred. The Nillages of San Francisco and Limache have been totally destroyed, including the losotally destroyed, including the hos-

Communication Re-established.

The task of the authorities in the present situation became casier to day on account of the fact that telegraph and telephone communications was re-established between Valparaiso and Santiago, enabling the Governor of Valparaiso to consult at length with the authorities here.

Nothing definite appears to be known regarding the number of people who lost their lives as a result of the earthquake and fres at Valparaiso. The authorities there only mention having taken sixty bodies from the ruins, though they add that the number of injured is very great.

Supplies Pouring In.

Supples Pouring 10.

An ambulance train left here to-day for Valparaiso with a large supply of medicines, etc., and a detachment of medical students who have volunteered to assist the earthquake sufferers. The train also took a quantity of provisions. Supplies of food and medicines have also been sent to other towns which have suffered from the earthquakes.

Preparations are being made to resume trading on the Santiago Stock Exchange,

trading on the Santiago Stock Exchange, interrupted since the earthquake, and the principal financial houses are taking steps to guard against a financial panic. Laughable Incident.

In the midst of so much distress, a laughable incident occurred. A detachment of scarbineers, while on its way to Valparaiso, made a halt for refreshments. While the cavalry men were dismounted their horses bolted towards Valparaiso and the carbineers were compelled to make their way to that city on foot or in any vehicles which they were able to requisition at short notice.

As the correspondent closed this dispatch a further slight carth shock made patch a further slight earth shock made the building in which he was writing tremble to its foundations.

CINCINNATI, OHIO, August 21.—Edgar Allan, Jr., of Richmond, Va., has been selected a member of the national committee of the Reform party, a new political party, an outgrowth of the wave political party, an otigrowth of the wave of reform which recently swept the country. George F. Watson, of San Francisco, the originator of the party, at the Gusson House, last night, gave out the selections he has made for the national committee, which will have one member in each city in the United States having a population of more than 50,000. Out of twelve names recommended to him from each city he selected one at random. Only a few of them have been notified as yet. Antigraft, anti-rust, honesty and truth will be the principles of the party. Mudslinging will not be tolerated in the campaigns.

political service, influence, or the campaign contributions they are able or willing to make, are offered to the voters of New York county this fail.

A committee of thirty-five lawyers, with Iton, Joseph H. Chante as charman and Judge Allon B. Parker, as vice-chalrman, have selected a ticket, including ten candidates for Justices of the Supreme Court, two for the Court of General Sessions, and a candidate for Surrogate. The ticket has already received the approval of over 1,700 members of the New York bar, and will cut an important figure in the fall elections.

The judicinry nominators, the name acopted by the Choate committee, have orened headquarters, and are proceeding actively with the work of placing their candidates in nomination by petition. The committee has acted his response to a general demand from lawyers and the public generally for fudicial candidates of proven ability and independence, who would be free from obligations or connections that might interfere with impartial and efficient administration of fusities. This is their ticket: For Justices of the Supreme Court, Edward S. Clinch, Theodore Connoly, Lewis I. Delafield, John Frankenheimer, Leonard A. Giegerich, Arthur H. Masten, Samuel H. Ordway, Charles E. Rushmore, Lawrence E. Sexton, Edward B. Whitney; for Surregate, Frank T. Flizgerald; General Sessions; Rufus B. Cowing and William E. Wyatt.

Movement Growing. Movement Growing.

Ever since Richard Croker testified be fore the Mazet Committee that Tammany expected judges nominated and elected by it to favor the "organization" whenever they could do so, there has been a growing belief that something should be done to remove the choice of judges from could be control. The discovery that

done to remove the choice of judges from political control. The discovery that heavy campaign contributions had come to be almost a condition precedent to nomination for judicial positions by the regular parties strengthened this belief. Then came the plan of the judiciary nominators to choose candidates by a sert of referendum of lawyers and citators in second without result to neity. sert of referendum of lawyers and citizens in general, without regard to party.

The lead of the judiciary nominators is being followed in several other cities. Movements are on foot in Brooklyn, Buffalo, Pittsburg and Chicago. A Citizens's Committee of one hundred is meking up a ticket in Brooklyn, auggestions as to the best men being well-comed from all quarters. The experience a Buffalo shows how easy it is for an independent movement of this kind to be swallowed up by the politicians. The Dar Association there had the choice of nominees in hand to start with, but the movement was soon captured by men whose party allogiance was stronger than their desire to further absolutely independent judiciary nominations. Anticipating such a possibility in New York, the Choate Committee has kept free from any organization through which its actions might be controlled or influenced.
